

# GYROSCOPES

## The Gyro House (TGH)

~ Our Name says it all ~

Gyroscopes are our Primary business and have been since 1957. Attitude, directional, vacuum, electric, panel mount, remotely mounted, *we do them all.*

We don't just overhaul your gyroscopes, we Zero-Time them. All units are totally disassembled, inspected, and re-built using factory new parts. We never rework bearings; all are factory new FAA approved replacements with every overhaul. Our technicians dynamically rebalance all rotors in-house to within one-micron tolerances.

Providing aviation overhaul & exchange instruments is the core of our business. We know you need a part quickly, so we stock a large inventory of gyroscopes ready for installation. Our goal is to get your customer back in the air without delay!

## REMOTE GYRO CAPABILITIES

DG-233, -241, -242, -206A, -234, -235, -236, -244

C-12, C-14A, C-14D

VG-311, VG-312, VG-313, VG-314

VG-14, VG-14A, VG-14H

332E4, 332E5, 332D11, 332D11A, 332D11B, 332D-11T

VG204, VG206, VG208

## Capabilities Include:

- Aeritalia
- AIM
- Allied Signal
- Bendix
- L-3 Communications/B.F. Goodrich
- Collins
- DBA
- EDO-Aire
- Flightline
- Guidance Technology
- Honeywell
- JET
- Lear Siegler
- Mid-Continent
- R.C. Allen
- SFENA
- Sigma-Tek
- Sperry
